PRODUCT INFORMATION

Agroleaf

0-40-25+1.2Mg+2B+FV

Foliar nutrition with FertiVant

ICL water-soluble foliar fertilizer with FertiVant technology to improve nutrient spreading and retention on leaves. Origin: Israel. Pack sizes: 1 kg and 25 kg.

FertiVant technology

- Distributes nutrients uniformly over the leaf surface.
- Supports nutrient penetration through the leaf cuticle.
- Retains nutrients on leaves for gradual uptake.

Nutrient composition

Phosphorus (P_2O_5)	40%
Potassium (K_2O)	25%
Magnesium (Mg)	1.2%
Boron (B)	2%

Additive: FertiVant (FV)

Benefits

- Supports flower initiation, flowering and fruit set.
- Supports healthy foliage and photosynthesis.
- Supports pollen formation and pollination.
- Supports rooting and recovery after planting and harvest.
- Contributes to crop yield and produce quality.

Recommended application rates

Crop group / stage	Mixing rate	Frequency
Vegetables - rooting	25 g / 10 L water	By growth stage
Vegetables - flowering and fruiting	50 g / 10 L water	2-3 times/cycle
Fruit and perennial crops - young plants	500 g / 100 L water	By growth stage
Perennials - flower initiation / flowering	0.5-1 kg / 100 L water	Every 7-10 days

Foliar application; follow the label and crop-specific technical advice.
